Education

Ajay Kumar Garg Engineering College, Ghaziabad

B.Tech in Computer Science

CGPA – 8.5

Oct. 2023 – Present

Experience

Sprinpak Manufacturing LLP

Intern - Machine Learning Developer

Jun. 2025 – Aug. 2025

Remote

- Built an automated employee check-in/check-out using facial recognition with 90%+ accuracy for 100+ employees, saving 6 hours of manual work daily.
- Designed and implemented the end-to-end facial recognition pipeline, including face detection, embedding generation, database integration, and real-time attendance marking.
- Collaborated with 5+ team members during system development, testing, and deployment, ensuring smooth integration into organizational workflows.

Computer Society Of India

GenAI & ML Developer

Nov. 2024 – Present

Ghaziabad, Uttar Pradesh

- Developed and evaluated ML models, achieving 90%+ accuracy through data preprocessing, feature engineering, and model optimization.
- Built and integrated RAG pipelines using LangChain, HuggingFace embeddings, and vector databases to enable context-aware response generation and semantic information retrieval within a 50+ member multidisciplinary team.

IEEE (Institute of Electrical and Electronics Engineers)

Student Member

Dec. 2024 – Jan. 2026

Ghaziabad, Uttar Pradesh

- Collaborated with global IEEE researchers on AI, IoT, and sustainable computing, reviewing 10+ papers and organizing 3+ tech webinars for 200+ students.

Technical Skills

Programming Languages:	Python, C++, C
Frameworks & Libraries:	Scikit-learn, Pandas, NumPy, Matplotlib, FastAPI, LangChain, HuggingFace Embeddings
GenAI & RAG:	RAG Pipelines, FAISS, Qdrant, Prompt Engineering, Gemini API
Backend & Databases:	MySQL, PostgreSQL(Neon DB)
Developer Tools & Cloud:	Git, GitHub, Postman, Render, Streamlit
Core Skills:	API Development, Model Deployment, Data Preprocessing

Projects

AI Email Generator Using RAG – RAG, LangChain, FAISS, HuggingFace, Gemini API | Streamlit

[GitHub](#) | [Live Demo](#)

- Built a RAG-based AI Email Generator using LangChain, HuggingFace embeddings, FAISS, and Gemini API, indexing 50+ templates across 5 categories with top-2 semantic retrieval, reducing LLM hallucinations by 35% and generating context-aware emails in 2–3 seconds.
- Developed and deployed a FastAPI + Streamlit application with REST APIs, semantic search, and prompt engineering, reducing manual email writing time by 70% through automated context-aware generation.

AI Government Scheme Finder Using RAG – LangChain, HuggingFace, Qdrant Cloud | FastAPI

[GitHub](#) | [Live Demo](#)

- Implemented a scalable RAG pipeline using LangChain, HuggingFace, and Qdrant Cloud over 2000+ schemes (50K+ chunks), improving response accuracy and reducing hallucinations by 30%.
- Developed FastAPI APIs and deployed a Streamlit interface enabling real-time semantic search and structured scheme information retrieval with 3-4s average response time.

Face Recognition Attendance System – Python, ML, MediaPipe, SFace, ONNX | NeonDB

[GitHub](#)

- Created an ML-powered Face Recognition Attendance System using MediaPipe, SFace, and ONNX, achieving 95%+ accuracy for 50+ users with robust embedding generation.
- Improved system reliability by validating both face embeddings via cosine similarity and background color encoding to prevent spoofing and reduce false positives by 20%.
- Optimized database integration and recognition pipeline, reducing processing latency by 25%.

Achievements

- **Top 10 Performer – INCLUDE 4.0**
Achieved Top 10 rank out of 500+ students in a DSA and Competitive Programming competition organized by the Programming Club of AKGEC.
- **DRISHTI-NE Hackathon Finalist – Unstop Holiday Fest 2025 – IIM Shillong**
Selected for the finals of DRISHTI-NE Hackathon organized by Indian Institute of Management (IIM) Shillong, competing against 400+ teams and 1800+ participants nationwide.
- **Google Arcade 2025 – Google**
Engaged in hands-on labs and challenges focused on cloud technologies and Google ecosystem tools to build real-world development skills.
